

DENNIS KIMAITA

Software Developer | Aspiring Network & Cybersecurity Professional

Nairobi, Kenya | 0769375587 | d.kim.cyber@proton.me | github.com/kiMIGHTa

PROFESSIONAL SUMMARY

Computer Science graduate (Kenyatta University) with professional backend development experience — including a software development internship at Nimble Group and a backend developer role at Doros — alongside hands-on project work using Python, Django, and React. Skilled in backend development, REST API design, database modelling, and frontend integration. Complements this software foundation with practical knowledge of computer networking, operating systems, and hardware gained through academic study and self-directed practice with Cisco Packet Tracer, Linux, and virtualization tools.

Strong analytical and problem-solving ability, with a growing specialisation in cybersecurity, infrastructure security, and network administration. Seeking entry-level opportunities in software development, IT support, network support, graduate trainee programmes, or cybersecurity-related roles to build practical industry experience.

CAREER OBJECTIVE

To build a long-term career at the intersection of software engineering and cybersecurity — starting in development, IT support, or network engineering roles and progressing into security operations and infrastructure protection. Committed to continuously expanding skills in offensive security, penetration testing, and enterprise systems through hands-on practice and certification.

WORK EXPERIENCE

Development Intern — Nimble Group

May 2025 – Oct 2025

Full-time · Nairobi, Kenya (On-site)

- Worked as a development intern contributing to software development tasks and backend system support.
- Assisted in building and maintaining web-based applications and internal systems.
- Supported API development, debugging, and system testing in collaboration with senior developers.
- Participated in code reviews and agile development workflows.
- Gained hands-on experience with production-level development practices and team-based software engineering.

Backend Developer — Doros

Feb 2024 – Dec 2024

Full-time · Remote (Nairobi, Kenya)

- Developed backend systems and features for web applications using Python-based technologies.
- Designed and implemented RESTful APIs to support frontend and mobile integrations.
- Worked on database design, optimisation, and data management for application systems.
- Contributed to authentication, authorization, and core business logic implementation.
- Collaborated remotely with development teams to deliver and maintain production features.
- Strengthened practical experience in backend architecture, API development, and system integration.

EDUCATION

Bachelor of Science in Computer Science

Completed – Awaiting Conferral, 2026

Kenyatta University

PROFESSIONAL TRAINING & CERTIFICATIONS

- Moringa School – Software Development Program
- Cisco Networking Academy – Python Essentials 1

- Cisco Networking Academy – Python Essentials 2
- Cisco Networking Academy – Introduction to Cybersecurity
- ALX Professional Foundations Program

TECHNICAL SKILLS

Programming & Software Development

Languages & Frameworks: Python, Django, Django REST Framework, JavaScript, React, Kotlin, Android SDK, HTML5, CSS3

Other: REST API design and integration, SQLite, Firebase Authentication, Object-Oriented Programming

Tools & Platforms

Tools: Git & GitHub, Postman, Docker, VirtualBox, Cisco Packet Tracer, Burp Suite, VS Code, Linux Terminal

Networking

Concepts: OSI and TCP/IP models, IPv4 addressing and subnetting, network topologies and architectures, DNS, DHCP and NAT, routing and switching fundamentals

Practice: Network simulation and device configuration using Cisco Packet Tracer

Operating Systems & System Administration

Skills: Windows installation, configuration and troubleshooting; Linux command-line fundamentals; file system navigation and permissions; basic system administration

Computer Hardware

Knowledge areas: PC architecture, hardware compatibility, CPU/RAM/storage/motherboard concepts, troubleshooting methodology, peripheral devices

Cybersecurity Foundations

Areas: OWASP Top 10 awareness, web application security fundamentals, introductory penetration testing concepts, Burp Suite basics, threat and attack-surface awareness, bug bounty learning and web security research

PERSONAL & ACADEMIC PROJECTS

Find Your Friend — Real-Time Location Sharing App (Collaborative Project)

React Native (Expo), Node.js, Express, Socket.io, Redis, WebSockets, React Native Maps

- Co-developed a real-time location-sharing mobile app for events, concerts, and festivals in collaboration with a peer.
- Implemented WebSocket-based real-time communication using Socket.io for live location updates between connected users.
- Built backend services with Node.js and Express to manage event rooms, group sessions, and user synchronisation.
- Designed a smart group-code system for simplified session joining and sharing.
- Contributed to GPS-based tracking and map visualisation using React Native Maps and the Expo Location API.
- Implemented proximity-detection logic to trigger arrival notifications when users are within close range.
- Assisted in implementing security features including API key authentication, rate limiting, and CORS protection.
- Worked on scalable session handling with Redis support for distributed real-time communication.
- Supported deployment of backend services on cloud infrastructure (Render) for cross-network access.

Finance Tracker — Android Mobile Application

Kotlin, Android SDK, Firebase Authentication (Google Sign-In), SQLite/Local Storage, XML UI

- Developed an Android finance-tracking application for personal budgeting and expense monitoring.
- Implemented Google-based authentication using Firebase Authentication to enable secure user sign-in.

- Built features for recording income and expenses with categorised financial entries.
- Designed a clean and user-friendly mobile interface using XML layouts.
- Integrated local data storage to persist financial records on the device.
- Implemented core logic for calculating balances and tracking spending trends over time.
- Strengthened understanding of Android application architecture, authentication systems, and mobile development workflows.

Whisper Audio Transcription System

Python, OpenAI Whisper, HTML, CSS, JavaScript, Docker

- Developed an audio transcription application using the Whisper speech recognition model.
- Built a web interface for uploading audio files and generating transcripts.
- Implemented transcript export functionality.
- Containerised the application using Docker for portability and deployment.

Restaurant Ordering System

Django REST Framework, React, JavaScript

- Developed backend APIs for food-ordering workflows.
- Implemented cart functionality and order lifecycle management.
- Simulated payment processing and order status tracking.
- Integrated frontend components with backend REST APIs.

Django CRM System

Python, Django, SQLite, HTML, CSS

- Designed and developed a CRM system for managing users and customer records.
- Implemented authentication and role-based access control.
- Built complete CRUD functionality for managing system data.
- Structured the application using Django best practices.

Reinforcement Learning Experiment — FrozenLake Agent

Python, NumPy, Gymnasium

- Implemented a Q-learning agent for the FrozenLake environment.
- Built and maintained a state-action Q-table.
- Applied epsilon-greedy exploration with decay.

Networking Simulation Lab

Cisco Packet Tracer

- Designed and configured network topologies in a simulated environment.
- Practiced subnetting and IP addressing concepts.
- Simulated routing and switching behaviour across multiple devices.
- Explored DHCP and DNS configuration concepts.

TECHNICAL EXPERIENCE

- Built and tested multiple Python and Django applications.
- Practiced API development and debugging using Postman.
- Used Git and GitHub for version control and project management.
- Explored Linux environments and command-line workflows.
- Studied networking concepts and security principles through self-directed learning.
- Practiced browser debugging and web traffic inspection techniques.

SOFT SKILLS

Problem Solving • Analytical Thinking • Communication • Team Collaboration • Adaptability • Time Management • Attention to Detail • Continuous Learning

CAREER INTERESTS

Software Development • IT Support & Infrastructure • Network Engineering • Systems Administration • Cybersecurity Operations • SOC Analysis • Penetration Testing • Cloud & Infrastructure Security
